

# AI-Order Importer

Are you still entering buyer orders by hand?

Isn't it time to use Artificial Intelligence for this?

Before any manufacturing work can begin, it is critical to accurately break down buyer orders and examine them. Errors can creep in very quickly if this is done manually. Frequent changes in the orders can go unnoticed, causing unnecessary losses of time and money.

It is time to use the power of Artificial Intelligence. Faster, more reliable, and able to track and alert you of any changes made in the orders, Axind AI-extractor is the solution you have been waiting for.

## 3 SIMPLE STEPS

- 1. Drag and drop your buyer orders in the program
- 2. The system will automatically extract the relevant data and present a screen for confirmation
- 3. On confirmation, the order will be imported and created in the system

*One program for all your buyer orders, regardless of the format!  
Think of the amount of time that will be saved and the errors that will be prevented!*
