

# AI-Translator

Problems in understanding English buyer documents in your organisation?

Isn't it time to use Artificial Intelligence for this?

Before any manufacturing work can begin, it is critical to accurately understand your buyer documents. English is not a language understood by all the people in your organisation. Translation using the standard tools available results in inaccuracies.

Axind's AI-Translator uses the power of Artificial Intelligence but also allows use to use your lists of standardized translation to give accurate results.

## 4 SIMPLE STEPS

- Upload** Drag-and-drop your buyer documents into Axind AI Translator
- Extract** Selected text from your buyer document (PDF, Excel® etc.
- Display** Your company's standard translations are applied and all the strings are displayed. Individual corrections can be applied, as required.
- Output** The buyer documents are recreated with the translated text. Now you can use the translated documents in your company
