

# Axind PLM+ More than just a PLM.

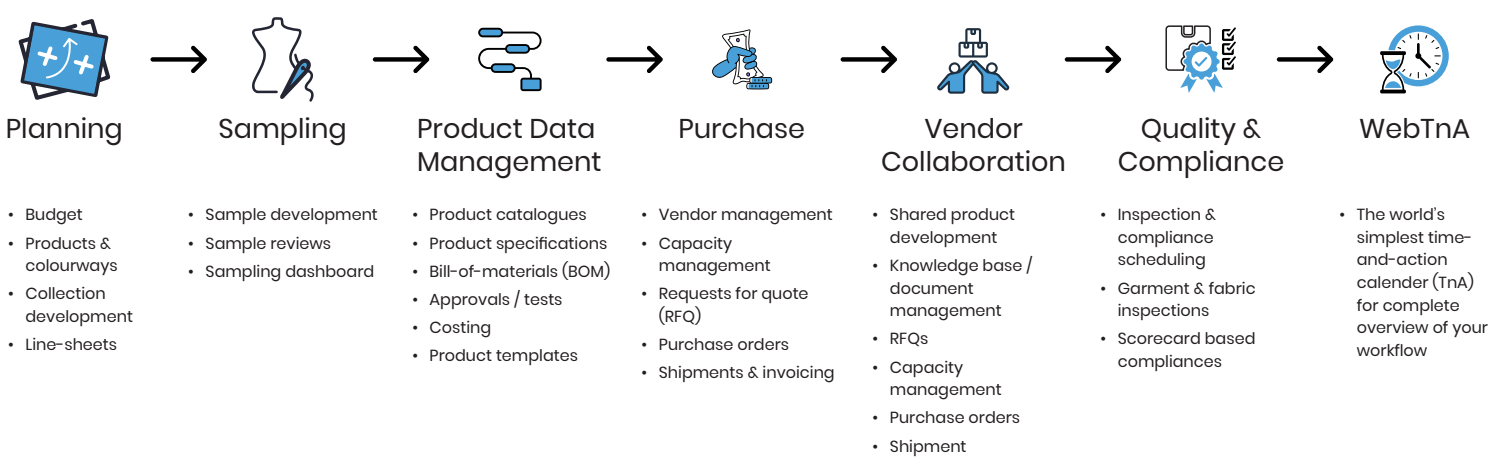

Axind PLM+ is designed for companies who want to spend more time designing fast selling products, and less time in managing people and processes.

## Why Axind PLM+ ?

Axind PLM+ helps you manage your product collections from planning to delivery. This translates to less time spent managing and maintaining software, and more time spent doing the work you want to do.

- Extensively customizable
- Multiple product categories including apparel, footwear, made ups, kitchenware, furniture etc.
- Seamless communication and collaboration among your global team of internal and external stakeholders
- Easy-to-use, minimal training required
- Quick to implement
- The solution is natively web-based, cross-platform, and designed for mobile computing
- Objects API enables two-sided integration with legacy and enterprise systems (SAP, Oracle etc.)
- Integration with material management in Axind OMNI, workflow in Axind WebTnA and automatic extraction of data in Axind AI-extractor
